NACE Level III Inspection and Coating Design

Our Level III NACE Inspectors play an integral role on site for our customers to verify all aspects of their coating project are installed per the owner's specification and material manufacturer's recommendations. Elite assures all surface preparations, ambient conditions, product mixing and application, Dry Film Thickness (DFT), and Holiday Inspections are accurately completed at the coating facility or in the field.

Elite Inspection also offers full Coating Design and Installation Consulting. Let us assist you in your next Coating Application and Coating Design Project. Elite Inspection is an active member of the National Association of Corrosion Engineers (NACE) and the Society for Protective Coatings (SSPC).
