AXUS Tool for Inspection of Pipe Support Contact Areas

Recent Advances in the NDE Technology and Inspection offer Plant and Pipeline Operators more methods to improve the quality plus efficiency of there pressure equipment reliability. We are introducing a new tool called the AXUS Tool. AXUS stands for Axial Ultrasound; sending a particular guided wave mode axially down a pipe provides the ability to interrogate a region in this case a Pipe Support. A remaining wall percentage measurement is giving without lifting the line. Any pipe size can now be inspected. . Give us a call for your inspection needs.

Pipe Support Contact Inspection
