Underground Line Locating

We focus on providing Safety First, high quality locating services that will not only meet legal and regulatory requirements, but will truly protect your underground facilities. We understand that *Accuracy* and *Quality* really do count when it comes to utility locating. Services detected include: Gas and Fuel Pipelines, Utilities, Fiber Optics, and PVC that is cable traced.

Elite Inspection utilizes trained, accountable field technicians, and backs them up with effective management systems. We make it our priority to complete requests on time, and we immediately communicate with excavators and utility owners on request that may be delayed to ensure the protection of customer facilities.

We understand that our services are an extension of our customer's business. We offer the finest trained and equipped field technicians to perform work for our customers. Our employees will ensure clear and complete mark out services per AWWA excavator or property owner.
